

## **IMRJ Title Page Template**

This page should be submitted as a separate document from the main text. This document will not be available for reviewers as we employ a double-blind review process. The title page should have the following information:

- i) Manuscript title without abbreviations
- ii) Names of each authors and institutions of origin: Full and accurate names, indicate last name with SMALL CAPS. For example: Mohammed Ali JAMALUDDIN, TAN Pei Pei and affiliations of institutions where the research was done, reflecting the order of authorship by using superscripted numbers.
- iii) Details of corresponding author: Full and accurate name, academic qualification(s) with respective institutions, full office address along with telephone and fax numbers, and valid e-mail address(es).
- iv) Acknowledgements: This section acknowledge any support given which is not covered by the author's contribution or funding sections. This may include administrative and technical support or donations in kind (e.g. materials used for experiments). Please note that personal pronouns such as 'I, my or me' are not allowed to be written in this section unless the study involved only one author.

In addition, a running title/running head (a brief title) which has less than 50 characters is required to be included in this page. Authors would also be asked to include the same during submission of manuscript to IMRJ.

### What information to include in a Title Page file

#### **Authors' names and affiliations**

#### **Acknowledgements**

#### **Ethics of Study**

Provide a 'Compliance with Ethical Standards' statement (for research involving human and/or animal subjects)

#### **Conflict of Interest**

Authors should include a Conflicts of Interest declaration in their manuscript.

Conflicts of Interest are situations that could be perceived to exert an undue influence on an author's presentation of their work. They may include, but are not limited to, financial, professional, contractual or personal relationships or situations.

Conflicts of Interest do not necessarily mean that an author's work has been compromised. Authors should declare any real or perceived Conflicts of Interest in order to be transparent about the context of their work.

If the manuscript has multiple authors, the author submitting the manuscript must include Conflicts of Interest declarations relevant to all contributing authors.
